Abstract (en)  
[origin: WO9923484A1] The invention relates to an Eddy current testing probe (1). According to the invention, a probe coil arrangement (7) is positioned on a film (4) on a film support (8). Said film support (8) is adapted to the shape of the object to be tested. This enables the test to be carried out quickly and with little disturbance. The invention also relates to a method for producing an Eddy current testing probe (1) and to an Eddy current testing method.
