Abstract (en)
[origin: EP1029489A1] The fryer has at least one heater for the oil vessel and a controller with a manually operated fryer setting device for selecting the frying mode. A fat melting setting device is provided for selecting a fat melting process, which can be selected independently of the selection of the fryer mode and vice-versa. The controller sets the surface temp. of the heating body to melt but not burn fat when a fat melting process is selected..
