Abstract (en)
Adhesive plaster for stain removal, comprises a gauze strip between two adhesive films, a stain dissolving substance, side adhesive surfaces and fixing grooves. An adhesive plaster for stain removal, comprises a gauze strip (2) located between two adhesive films. The gauze is coated with a stain dissolving substance, and is firmly connected to the cover film (1). The lower side has a closure adhesive film (4) which can be pulled off. Side adhesive surfaces (6) stick to the textile material and contain the working area. The lower film ensures an air-tight seal until the plaster is required. Fixing grooves (5) connect the cover film to the gauze strip.

Abstract (de)
Das luftdicht verschlossene Heftpflaster enthält einen mit einer Fleckentfernungssubstanz beschichteten Gazestreifen und wird auf kleinere Schmutzflecke geklebt. Durch das Einpressen der feuchten Wirksubstanz in das Textilgewebe beim Andrücken mit den Fingern und der Vermeidung ihres zu schnellen Abtrocknens durch seine Deckklebefolie entfaltet dieses eine besonders effektive Reinigungskraft auch in tieferer Stoffschicht.
