Abstract (en)

[origin: EP1029791A2] The device for packing small articles in a stack comprises a transporter (2,4) and a quality control device (3) which inspects the articles for defects and generates data about them. this is fed to a control device for a stacking machine. A separating device (5,6) is connected to the stacker and cooperates with the control device to remove defective articles. An Independent claim is included for a process for packing small articles.
