Abstract (en)

[origin: EP1030001A2] The cover pipe system consisting of a number of cover pipes (1) provided (for purposes of forming joints) with inner and outer screwed elements (2, 3) at their ends comprises a screwed connection which is installed into a bore in a cover pipe, is welded to the latter, and serves for ventilation and/or injection of an injection liquid. Also claimed is a method for producing such cover pipe systems. The method involves production of bores at specified points of the cover pipe system for screwed connections.
