Abstract (en)

[origin: EP1030141A2] A refrigerator (1) comprises a cabinet (2) in which at least one preservation compartment (4) is provided, and a door (3) hinged to said cabinet (2) and arranged to close said compartment (4), said door (3) comprising a door liner (5) arranged to face said compartment (4) and further comprising at least one tray (8) for supporting food and a plurality of support elements (10) for said tray (8) which enable it to be positioned at different heights on said door liner (5). In this latter there is positioned a member (11) acting as a dispenser for drink or beverage containers (12) which is open at opposing ends (at 13A and 34) and is arranged to contain drink cans or bottles (12), said member (11) lowerly comprising a shelf (33) for supporting one of said containers (12) in such a manner as to enable it to be gripped by a user.
