Abstract (en)
[origin: EP1030142A2] The refrigerator has a thermally insulating housing accommodating at least one cold chamber and at least one door, whereby the door and housing have an outer cladding and a separate inner cladding on which bearer elements for mounting refrigerator equipment, e.g. storage containers, shelves, evaporators or similar, are mounted. The bearer elements are made of at least one base body (16) for attachment to the inner cladding (13) and at least one auxiliary body (18) mounted on it.
