Abstract (en)
[origin: EP1030146A2] The refrigerator has at least one cold chamber (12) inside a thermally insulating housing, able to be closed with a door and in which intermediate shelves are fitted to enable goods to be accommodated. At least one shelf is movably mounted in guides on the side walls (14) to slide like a drawer. The guides are in the form of lateral bearer arms of a U-shaped bearer frame (18) removably attached to the side walls of the cold chamber.
