Abstract (en)
[origin: WO0016672A1] A cooking appliance (10) is disclosed which may cook food materials in a sealed cooking zone (21) under pressure for a period of time during which power supply in the heating means (16) is controlled by control means (35) to be at a first lower level, the pressure within the zone (21) being then vented and the control means (35) increasing the power level supplied to the heating means (16) to a second relatively higher level.
