Abstract (en)

[origin: DE19843337A1] A mechanism adjusts the position and tension in bicycle controls such as cables linked to brakes and gears. The cable (6) is located within a sheath (5), one end (17) of which rests against a counter-bearing (14). The counter-bearing (14) is positioned at the frame cable inlet (1), and has a bush (3) with adjustment thread (9). The bush (3) has a transitional section (10) surrounding the sheath (5) and bearing an oil seal (13).
