Abstract (en)
[origin: EP1031296A2] The present invention relates to a brush mechanism designed especially for cleaning the inside of air climatization ducts, said brush mechanism comprising a brush (2) and flexible driving axle (1) for rotating the brush (2), the casing of said flexible driving axle containing an axle which has been designed to rotate the brush (2). A brush (2) in a brush mechanism formed in accordance with the invention is at least partially overlapping the casing of the driving axle (1). <IMAGE>
