Abstract (en)

A connection system for uprights and shelves in general, characterised by comprising: an L-shaped upright (2) comprising in its flanges (8) a plurality of pairs of slots (10) converging downwards towards the corner of the upright, a plate (4) shaped as a conical surface portion (12) with its lateral edges having a height less than the length of the slots (10), the distance between the lower corners of the lateral edges (12) corresponding to the distance between the lower edges (18) of the two slots (10), the distance between the upper corners (20) of the lateral edges being less than the distance between the upper edges (22) of the two slots (10), said plate being provided with means (14) for preventing its horizontal movement, a bent-edged shelf (6) having in its corner region (26) two notches (30) for its coupling to the plate, that edge (34) of each notch closer to the corner (26) being inclined to an extent substantially equal to the inclination of the slots (10). <IMAGE>
