Abstract (en)
[origin: EP1031305A2] The device has a holder (1) fixing the ring (2) or other item on the base body (3). The holder has arms (4,5) connectable at their one end to form a plug and having in one end area a first chamber for holding the ring. The holder can be clamped in the recess (15) of the base body by its plug end. The first chamber is set in that end of the holder which can be opened and can be formed by two spring tongues which are directed towards each other and form the chamber base.
