Abstract (en)

[origin: EP1031684A1] A handle (1) for controlling a lock of a vehicle door (3) has a connecting structure (7) fitted to the door (3); a control lever (8) operated in use by a user's hand; and a control device (37) having a switching member (40) movable in a switching direction (C) to set the lock to a safety-off mode; the lever (8) has a fork (19) hinging the lever (8) to the structure (7) and connected in sliding manner inside a guide seat (11) on the structure (7) to enable the lever (8) to translate parallel to the switching direction (C) to directly activate the device (37). <IMAGE>
