Abstract (en)
[origin: DE19908337C1] The side fitting for a tilt/swing window or door has an elongated hole (L) for the rotating connection (X) in the fixed position, which is composed of two partial elongated holes (32) aligned with each other along the longitudinal line of the pin (59). One is at the coupling section (5) and the other is at the insert piece (6). The rotating connection (X) is formed by a durable linkage of the axis arm (4), coupling section (5) and the insert piece (6).
