Abstract (en)
[origin: EP1031795A2] The invention concerns a modular hydraulic assembly comprising a combination of at least two modules chosen among a pump module (A), a flow switch-deaeration device module (B), a three way valve module (C), and a sanitary module (D), said modules being provided with union and/or orienteering means to allow their coupling each other in function of the kind of boiler, and means for the connection with the hydraulic plants. <IMAGE>
