Abstract (en)  
[origin: EP1032082A2] The cable gland (1) has a gland element inserted in an opening in the wall of the transmission housing, fitted with an electrical insulation element (9), receiving the individual cable elements (6.1,6.2) of each electrical cable (7.1,7.2). Each of the cable elements is split into 2 sections within the insulation element, with the ends of the cable element sections joined together via crimp connections.
