Abstract (en)
A process (method) and system (apparatus) for mounting terminals t with electric wires a in cavities s of connector housings C. Press-connecting terminals t are initially loaded in cavities 14a arranged in an upper surface of a connector jig 14 and electric wires a are press-connected on the terminals t in the jigs 14. Then, the terminals t with electric wires a are transferred from the connector jig 14 to cavities 72 arranged in a lower surface of a inserting jig 71 by pins 83 arranged to contact and push the terminals t from below in the transfer direction. Then, the terminals t are loaded from the inserting jig 71 to cavities s of connector housings C from the back by blades 73 arranged to contact and push the terminals from one end in the inserting directing. <IMAGE>
