Abstract (en)

[origin: WO9922075A1] A noisescree comprising two rows (1, 2) of live, essentially vertical tree stems or branches (3) set in a growth medium, and a layer of a soundproofing material disposed between the rows (1, 2), and being composed of one or more noisescree elements comprising two layers of live tree stems or branches (3) and a layer of mineral fibre batt or mat (6, 7, 8, 9) positioned between these layers, where the layers (1, 2) of live tree stems or branches at their lowermost ends (4) have greater extent than the layer of soundproofing material, where the layers (1, 2) of tree stems or branches by the layer of soundproofing material are kept together by means of interconnected laths (10) positioned on opposite sides of the element and extending essentially perpendicularly to the longitudinal direction of the tree stems or branches (3) and along the entire length of the noisescree element.
