Abstract (en)

[origin: WO9925964A1] The present invention provides a mounting article (20) having reduced or relieved surface tension for pollution control devices (10) which utilize a monolith structure (13) within a metal housing (12). The mounting article comprises a sheet material (20) having major top (23) and bottom (25) surfaces, a thickness, a length and a width, said sheet material having at least one score-line (24) in a surface of said sheet material. The present invention also provides a pollution control device comprising a housing, a pollution control element disposed within the housing, and a mounting article of the invention disposed between the pollution control element and the housing.
