Abstract (en)
[origin: DE19750991A1] After termination of dialing a first number from the first number memory (5) during the selection, a further call number of the first number memory is selected, if during the last dialing it has been determined that the called subscriber cannot be reached, or a connection to him does not exist any more. The further call number is pref. selected from the memory as soon as it has been determined that the line to the called subscriber is engaged.
