Abstract (en)

[origin: FR2771245A1] The frame consists of a plate (3) on which the electronic circuit board (8) is mounted. This is accessible from the rear of the case (1) of the telephone set. The plate pivots (4) open from one end to allow access to the circuit boards and other parts (11,12) of the telephone. The plate is held closed by a sprung latch (22) engaging on a small flange on the edge of the support plate (21).
