Abstract (en)

[origin: DE19751423A1] The invention relates to a window heater, especially for a motor vehicle, comprising a resistance heating device placed on the window or integrated therein. Said heating device can be connected to a voltage source via terminal contacts and electrical switching means. Said switching means (24) consists of a semi-conductor switching element (24) mounted directly on the window (12) to be heated.
