Abstract (en)

The invention realizes a toolhead or toolholder suited to be applied to the prismatic base of a working member for ripper or milling drums of machines for removing ground, comprising a tapering cylindrical body (6) that is coupled into a corresponding tapering cylindrical hole (5) of said prismatic base (3) and presents one end (7) having a seat (8) that holds the shank (9) of a ripper tool (10). Said toolhead have the longitudinal axis (11) of said tapering cylindrical body (6) at an angle to the longitudinal axis (12) of said seat (8). <IMAGE>
