Abstract (en)

A method for producing a baked bread product directly into the final package, which method comprises packaging a partially baked bread product into a perforated film of a heat-resistant thermoplastic material, such as nylon 66, nylon 46 or nylon 6/66, and baking off said partially baked bread product while it is retained within said film. The perforated film and a packaged bread product comprising a baked or partially baked bread product surrounded by the perforated film are also described and claimed.
