Abstract (en)

[origin: EP1033330A1] The device for picking up, emptying and transporting a container (1) by trolley, fork-lift truck, etc. comprises a fixing strap (2) which is attached to a pivot (13) on the top half of the rear wall of the container. This has a clasp (15, 16) which allows it to be fastened at the bottom of the container rear wall when not in use. The strap can be pivoted upwards and fastened by a second fastener (17) to the top (10) of the container to attach it to, e.g. the forks of a fork-lift truck.
