Abstract (en)

[origin: EP1033442A2] The finger plate (7) for spanning an expansion joint in a roadway has cavities (10) in which bridging components (13) are arranged that extend from the base (14) of the cavity between the fingers (9) in the direction of their length over the finger point(15). An Independent claim is included for a device for spanning an expansion joint in a roadway.
