Abstract (en)

[origin: EP1033449A2] Two outside supports (12,13) formed as profiled hollow sections fit together at their ends with a butt joint formed by a coupling member (6) mounted between the outside supports. The coupling member has extensions (11) which engage into the inside of the outside supports. The outside faces of the coupling member align flush with the outside faces of the outside supports. The coupling member has ribs spread out on the inner circumference.
