Abstract (en)
[origin: WO9928684A1] The present invention relates to pipe closure apparatus (70) providing a seal to prevent fluid flow from a pipe outlet (106) in particular from radiator pipe outlets. The apparatus preferably comprises sealing means (88) which can be clamped onto a pipe body (100) to which the pipe outlet (106) is attached. The sealing means (88) preferably being maintained in sealing engagement with the pipe outlet (106) by biasing means (94). The present invention further provides a quick and easy method of sealing radiator tailpiece outlets for removal of radiators from a heating system.
