Abstract (en)
[origin: EP1034891A2] The water supply unit (1) comprises at least a water connection (A) and a water preparation unit (1) with safety switch (1b) which switches off the cleaning apparatus when the pressure raising device (4) is no longer supplied with sufficient water. The safety switch can be a floating switch triggered when a certain water level is not reached. An overflow switch can be provided to stop the water supply when the required water level is reached.
