Abstract (en)

[origin: EP1035246A2] The values are measured and/or deposited in the storage device of the appliance. The residual dampness can be displayed by the display unit (10) after the conclusion of a drying program. The display unit (10) is an acoustic or optical device. In the case of an optical device, the residual dampness is indicated through e.g. a light beam (11) or a digit.
