Abstract (en)

[origin: EP1035267A2] Several support elements make up a framework for supporting fire-resistant glass panes or other filler panels (1) with the interposition of a profiled seal (6) encased by a U-shaped profile element (5) of fire-resistant material. The space between the base of the profiled element and the profiled seal is filled up by a heat-resistant intumescent mass (7). the upper and lower supports (2, 3) are connected by to the filler panels by separate screws (8).
