Abstract (en)
Electrically operated lock (4) for a door of a motor vehicle, provided with a locking unit (7), an operating unit (8) connectable to corresponding manual operating members (5, 22) associated with the door (3) and capable of interacting with the locking unit (7) to cause it to open, first and second disabling means (70, 37) which can be activated selectively to disable the opening of the locking unit (7) from the inside and from the outside of the motor vehicle respectively, and an electrical actuator (58) having an output member (60) movable from a rest position along a first path (S) to cause the opening of the locking unit (7), and along a second path (T), different from the first path (S), to selectively activate the first blocking means (70). <IMAGE>
