Abstract (en)
[origin: EP1035659A1] The radio receiver has a multi-antenna stage (33), a receiver stage (29) and a decoupling unit (11) between the output of an intermediate frequency amplifier (49) and a connecting line (31) between the receiver stage input and the multi-antenna stage. The decoupling effect is activated or deactivated by changing over between AM mode and FM mode or vice-versa.
