Abstract (en)  
[origin: FR2771645A1] The invention concerns a device for moving on snow (1) comprising several elements (3, 4, 5) made removably integral by abutted interlocking, the interlocked elements (3, 4, 5) substantially giving the device (1) the shape of a ski, means (7) provided for retaining a boot (2) being made integral with one of the elements (4), a strap (6) maintaining the interlocked elements (3, 4, 5). The invention is characterised in that the strap (6) is arranged outside the elements (3, 4, 5) on one side of the device (1) opposite the side arranged for retaining the boot (2), the strap (6) being made removably integral at least at one front end (11) and one rear end (15) of the device (1) so as to maintain the interlocked elements (3, 4, 5).
