Abstract (en)
[origin: WO9838112A1] A package and a method of making the same are described. The package includes a temperature-sensitive or time-temperature-sensitive product, which is enclosed in a surrounding casing. Besides the package includes a temperature-sensitive or time-temperature-sensitive indicator, wherein: a) the casing (2, 7) is provided with printed information about the indicator, b) the indicator (5) is arranged inside the casing (2, 7), but separated from the product (1), c) the casing (2, 7) containing the product (1) and the indicator (5) is sealed (12), d) the indicator (5) and the printed information can be observed from the exterior of the package. When making the package, the product and the indicator are enclosed separated in the casing, which is sealed, the casing being provided with printed information about the indicator and is at least partially transparent such that the indicator and the printed information can be observed from the exterior of the package.
