Abstract (en)

[origin: EP0921192A1] The invention relates to activation of apoptosis by means of interference of Hou-like and/or IFP35-like compounds. Also the invention relates to anti-tumor therapies with compounds, which negatively interfere with Hou-like and/or IFP35-like compounds leading to induction of apoptosis, resulting in the elimination of tumor cells. Also the invention relates to therapies for diseases related to aberrant apoptosis induction, such as auto-immune disease. Also the invention describes the diagnosis of cells, which are susceptible to apoptin- or apoptin-like induced apoptosis.
