Abstract (en)
[origin: WO9957401A1] The invention relates to a closing edge safety device that consists of a safety strip (1) that has an electric switching device which is made up of a plurality of contact elements (2) that are arranged next to each other in a flexible tube (3). The contact elements (2) can be magnetized, an expander chord (5) can pass through them or they can lie on top of each other as a result of their weight, whereby they are subjected to a certain amount of pre-tension.
