Abstract (en)

[origin: FR2783972A1] The invention concerns a non-volatile memory cell comprising a floating gate type memory element (58), a source zone, a drain zone, a channel zone and a control gate (68), the floating gate comprising a chip made of conductor or semiconductor material and a layer (58, 64) made of conductor or semiconductor material, formed and etched above the chip of conductor or semiconductor material, in electrical contact therewith.
