Abstract (en)
[origin: EP1036535A2] The water drainage channel (30) running around at least part of the inner periphery of the shower tub (12) is incorporated into the top side of the tub rim (24), at roughly the same height as the bottom side of the shower door. When the door is closed it lies on the inside of the drainage channel. The shower screen (10) is formed by partition walls (14) with at least one hinged or sliding door leaf (18) attached to a partition wall or corner post (16). The bottom side of the door is smooth or profile-less.
