Abstract (en)

[origin: EP1036720A2] The transporting device has a track carrier (3) for transporting the vehicle (5). There is at least one suspension cable (1) running along the track carrier. At least one sector of the track carrier is hung directly or via an intermediate element (4) from the suspension cable. There is at least one stabilizing cable (7, 7') at the side of or below the cross section of the track carrier.
