Abstract (en)
[origin: EP1036753A2] Both ends of the lifting magnets (10) have a guide (16,17) at right angles to them and along which moves a swivel arm (22,23) each with a safety grip. The other end of the swivel arm has safety grips (24,25) which can turn and be adjusted in height. The guide consists of a spindle along which a spindle nut is adjustable in height. A permanent magnet or electro magnet has a magnet coil in a housing. The top end of the guide is connected to a suspension (14,15).
