Abstract (en)

A double-glazing unit with internal blind, comprising a perimetric frame which supports two parallel glass panes so as to form a sealed air space. Inside the air space, the blind is suitable to be moved from a packed condition to an opened-out condition. The double-glazing unit has, at each one of the uprights of the frame, a longitudinal channel inside which the lateral ends of the blind slide during its opening/packing. <IMAGE>
