Abstract (en)

[origin: EP1037225A2] The operating device is composed of a recording casing for a printed circuit board, and push buttons fixed in the casing for operating contacts of the printed circuit board associated with tip- or micro-switches. Each push button can be pressed against the resistance of at least one spring element on the contact of the respective tip- or micro-switch. A recording aperture (3) is formed for each push button in the recording casing. The spring element (9) is an element of the casing (1).
