Abstract (en)

[origin: EP1037243A2] The auxiliary switch has a first shaft journal (32) coupled with the selector shaft of a protection switch and a tooth pinion section (34). A second shaft journal (36) has a gearwheel section (35) coupled with the tooth pinion section and a projection (37) received in a recess (39) of a slide (20) such that the rotation of the selector shaft causes rotation of first shaft journal, tooth pinion, gearwheel and second shaft journal for driving the slide.
