Abstract (en)

[origin: EP1037323A2] The wiring loom connector used in a road vehicle has two main parts (2,3) that fit together with the contacts enclosed between the parts. The plug section has a series of apertures (10-12) and into each of these is fitted a connecting plug (8). The end of the plug has a seal (9). The two main parts are protected by an inset seal (4).
