Abstract (en)

[origin: DE19755477A1] The invention relates to a device for monitoring a processing liquid. The device comprises at least one sensor for generating at least one monitoring signal. A device is provided for detecting, storing and maintaining the reliability performance of the sensor. In addition, a device is provided for processing the monitoring signal and for generating a signal for indirect or direct influence of the composition of the processing liquid. Actuators are also provided for converting given criteria or specified values.
