Abstract (en)

[origin: WO9930910A1] The invention relates to a method for producing a printed product on a web-fed rotary newspaper-printing press. The aim of the invention is to produce a product whose dimensions may be varied. To this end, using paper webs with a constant width, one or more sub-paper webs (2, 4, 7, 8, 9, 11, 12) of a preselected and at least somewhat smaller width are combined and brought together.
