Abstract (en)
[origin: US6401924B1] The invention relates to a device for supporting at least one object that is to be suspended from a peg of a display unit. According to the invention, it consists in a sleeve (10) of heat-shrink plastics material having a non-shrunk top portion (10.1) which is flattened face against face and has a through hole (11) for suspending the device, and a bottom portion (10.2) which is shrunk on a top portion of the object(s) concerned so as to enable said object(s) to be suspended.
