Abstract (en)

[origin: WO9929606A1] The invention concerns a method for cutting out streamers in strips, consisting in moving forward a streamer (2) step by step in a plane along a direction (F), cutting (5) out the streamer in parallel strips, transversely to the forward motion direction, unwinding an adhesive tape, and winding the cut out streamer strips, on one face of which the tape is glued. Said method further consists, after cutting out each strip, in transferring the latter in (7) at some distance from the streamer forward motion plane, and gluing the adhesive tape to the cut out strip, for said winding, said streamer forward motion by a step for cutting the next strip being carried out during said transfer, and optionally during said gluing.
